Index allocation: A percentage that represents the proportion of the strategy option that is associated with the performance of the index.

Declared rate allocation: A percentage that represents the proportion of the strategy option that is multiplied by the declared rate.

Declared rate: An interest rate established by Nationwide.

Strategy spread: An annual percentage rate deducted when calculating strategy earnings.

Rates and spreads are subject to change. Have your financial professional contact Nationwide[®] for current rates.

Contingent Deferred Sales Charge (CDSC)

Should your needs change unexpectedly and you need to take an excess withdrawal, a withdrawal that is above the free withdrawal amount available in a given contract year, you are always entitled to access additional monies, keeping in mind that certain charges and penalties may apply. Any amount withdrawn in excess of the remaining free withdrawal amount is subject to a CDSC. For all excess withdrawals, you will only receive a prorated amount of interim strategy earnings-to-date. Below is the CDSC schedule.

Completed Contract Years	0	1	2	3	4	5	6	7	8	9+
CDSC Percentage	9%	8.9%	7.9%	7%	6%	5%	4%	3%	2%	0%

Market Value Adjustment (MVA)

The MVA is an adjustment that may be applied to the contract if you make a partial withdrawal or fully surrender your contract before the end of the Contingent Deferred Sales Charge (CDSC) period. Any amount withdrawn in excess of the remaining free withdrawal amount is subject to a CDSC, and MVA if applicable. The MVA may be positive, negative or zero depending on whether interest rate conditions have stayed the same, decreased or increased since you purchased the contract. If interest rate conditions increase from the time the contract was issued, it will result in a negative MVA, which decreases the amount taken as a distribution. Conversely, if interest rates decrease, it will result in a positive MVA, which increases the amount of the distribution.
