

Release Date: 12-31-2020

American Century VP Inflation Protection Fund — Class II

Investment Strategy from investment's prospectus

The investment seeks long-term total return using a strategy that seeks to protect against U.S. inflation. The fund invests substantially all of its assets in investment-grade debt securities. To help protect against U.S. inflation, under normal conditions the fund will invest over 50% of its assets in inflation-indexed debt securities. It also may invest in debt securities that are not inflation-indexed. The fund also may invest in derivative instruments, provided that such investments are in keeping with the fund's investment objective.

Category Description: Inflation-Protected Bond

Inflation-protected bond portfolios invest primarily in fixed-income that increase coupon and/or principal payments at the rate of inflation. These bonds can be issued by any organization, but the U.S. Treasury is currently the largest issuer for these types of securities. Most of these portfolios buy bonds with intermediate- to long-term maturities.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
