

Release Date: 12-31-2020

BlackRock High Yield VI Fund — Class III

Investment Strategy from investment's prospectus

The investment seeks to maximize total return, consistent with income generation and prudent investment management. The fund invests primarily in non-investment grade bonds with maturities of ten years or less. It normally invests at least 80% of its assets in high yield bonds. The fund may invest up to 30% of its assets in non-dollar denominated bonds of issuers located outside of the United States. Its investment in non-dollar denominated bonds may be on a currency hedged or unhedged basis.

Past name: BlackRock High Income V.I. 3.

Category Description: High Yield Bond

High-yield bond portfolios concentrate on lower-quality bonds. Because such bonds are riskier than those of higher-quality companies, they offer higher coupons to attract investors. Therefore, these funds generally offer higher yields than other types of funds, but they are also more vulnerable to economic and credit risk. While defaults have been rare lately, these funds can suffer losses from recessions and bankruptcies.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
