

# NVIT Government Money Market Fund — Class I

## Investment Strategy from investment's prospectus

The investment seeks as high a level of current income as is consistent with preserving capital and maintaining liquidity. The fund seeks to maintain a stable price of \$1.00 per share by using the amortized cost method of valuation to value portfolio securities. It invests primarily in a portfolio of U.S. government securities and repurchase agreements that are collateralized fully by cash or U.S. government securities, and which mature in 397 calendar days or less, with certain exceptions permitted by applicable regulations.

Past name: NVIT Money Market I.

## Category Description: Prime Money Market

These portfolios invest in short-term money market securities in order to provide a level of current income that is consistent with the preservation of capital. These funds designate themselves as Prime in form N-MFP and are required to sell and redeem shares based on the current market value of the securities in their underlying portfolios (transact at a "floating" net asset value).
