

NVIT Government Money Market Fund — Class V

Investment Strategy from investment's prospectus

The investment seeks as high a level of current income as is consistent with preserving capital and maintaining liquidity. The fund seeks to maintain a stable price of \$1.00 per share by using the amortized cost method of valuation to value portfolio securities. It invests primarily in a portfolio of U.S. government securities and repurchase agreements that are collateralized fully by cash or U.S. government securities, and which mature in 397 calendar days or less, with certain exceptions permitted by applicable regulations.

Past name: NVIT Money Market V.

Category Description: Money Market-Taxable

These portfolios invest in short-term money market securities in order to provide a level of current income that is consistent with the preservation of capital.

Category

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
