

Invesco VI Balanced-Risk Allocation Fund — Series II Shares

Investment Strategy from investment's prospectus

The investment seeks total return. The funds investment strategy is designed to provide capital loss protection during down markets by investing in multiple asset classes. Under normal market conditions, its portfolio management team allocates across three asset classes: equities, fixed income and commodities, such that no one asset class drives its performance. The funds exposure to these three asset classes will be achieved primarily through investments in derivative instruments, including, but not limited to, futures, options, currency forward contracts and swap agreements. The fund will invest in the Subsidiary to gain exposure to commodities markets.

Past name: Invesco Van Kampen VI Gbl Tact As Allcll.

Category Description: Tactical Allocation

Tactical Allocation portfolios seek to provide capital appreciation and income by actively shifting allocations between asset classes. These portfolios have material shifts across equity regions, and bond sectors on a frequent basis. To qualify for the Tactical Allocation category, the fund must first meet the requirements to be considered in an allocation category. Next, the fund must historically demonstrate material shifts within the primary asset classes either through a gradual shift over three years or through a series of material shifts on a quarterly basis. The cumulative asset class exposure changes must exceed 10% over the measurement period.

Volatility Analysis

In the past, this investment has shown a relatively small range of fluctuations relative to other investments. Based on this measure, currently more than two thirds of all investments have shown higher levels of risk. Consequently, this investment may appeal to investors looking for a conservative investment strategy.
