

Release Date: 06-30-2019

MFS® VIT New Discovery Series — Service Class

Investment Strategy from investment's prospectus

The investment seeks capital appreciation. The fund normally invests its assets primarily in equity securities. Equity securities include common stocks and other securities that represent an ownership interest (or right to acquire an ownership interest) in a company or other issuer. While it may invest the fund's assets in companies of any size, the fund primarily invests in companies with small capitalizations. It may invest its assets in foreign securities.

Past name: MFS VIT New Discovery Svc.

Category Description: Small Growth

Small-growth funds focus on faster-growing companies whose shares are at the lower end of the market-capitalization range. These funds tend to favor companies in up-and-coming industries or young firms in their early growth stages. As a result, the category tends to move in sync with the market for initial public offerings. Many of these funds invest in the technology, health-care and services sectors. Because these businesses are fast-growing and often richly valued, their stocks tend to be volatile.

Volatility Analysis

In the past, this investment has shown a wide range of price fluctuations relative to other investments. This investment may experience significant price increases in favorable markets or undergo large price declines in adverse markets. Some of this risk may be offset by owning other investments that follow different investment strategies.
